Vijay Maurya

Noida, UP | +91-7317651331 | vijayhp563@gmail.com | LinkedIn | GitHub | LeetCode

Objective

Computer Science student with hands-on experience in Python, Node.js, FastAPI, and AI-powered backend development. Passionate about building scalable APIs, microservices, and LLM-based applications using modern cloud technologies.

Technical Skills

Programming: Python, SQL, JavaScript
Backend Development: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, Microservices
AI Engineering: LangChain, LangGraph, Retrieval-Augmented Generation (RAG)
Databases & Caching: MongoDB, PostgreSQL, MySQL, Redis, Vector Databases
Cloud & DevOps: Docker, AWS (EC2, S3), Git, GitHub, GitHub Actions (CI/CD), Postman
Core Concepts: System Design, Authentication & Authorization, Data Structures & Algorithms

Training / Internship

IT Intern | *Web Development & Automation* **Aug 2026 - Nov 2026**
IMTS Institute *Noida, India*

- Developed and integrated web-based features to improve the institute's online learning platform.
- Automated Google Sheets workflows to streamline student data management and administrative operations.
- Integrated academic resources, including examination papers, MCQs, e-books, and course syllabi.
- Worked on data organization, process automation, and platform integration to improve operational efficiency.
- Collaborated with the team to identify workflow improvements and implement technical solutions.

Data Science Trainee | Certificate **Feb 2026 - July 2026**
PySpiders Software Development *Noida, India*

- Completed hands-on training in Python, SQL, Power BI, and AI/ML concepts.
- Built real-world projects and strengthened problem-solving through Data Structures & Algorithms.

Education

Bachelor of Technology in Computer Science (AI & ML) **Aug 2023 – Present**
Lamrin Tech Skills University, Ropar, Punjab *CGPA: 8.5 / 10*

Projects

CodeOrbit – Multi-Tenant HRMS Portal | *Full-Stack Development* | Live Link **Nov 2026**

- Developed a comprehensive Human Resource Management System (HRMS) to streamline employee management and organizational workflows.
- Built a responsive frontend using React.js with reusable components and an intuitive dashboard.
- Developed RESTful APIs using Node.js and Express.js for employee records, attendance, leave management, and HR operations.
- Implemented role-based access control (RBAC), authentication, and authorization for Admin, HR, and Employee roles.
- Designed a multi-tenant SaaS architecture to support multiple organizations with isolated data and secure access.
- Integrated database operations, data validation, and centralized management of HR activities.

Multi-Agent AI Platform | *React.js, Node.js, Express.js, MongoDB, LangGraph, LangChain* **Jan 2026**

- Developing a Multi-Agent AI platform using the MERN stack, microservices architecture, LangGraph, LangChain, and RAG with Qdrant Vector Database and Redis for semantic search, caching, and AI memory.
- Building secure REST APIs with Node.js, Express.js, JWT authentication, Docker containerization, and deploying cloud infrastructure on AWS for scalable AI services.

Dynamic Pricing Predictor | *Python, Scikit-learn, Streamlit* | GitHub **Nov 2025**

- Built ML model to predict ride prices using demand, traffic, and trip data.
- Performed EDA, feature engineering, and created Streamlit analytics dashboard.

Awards & Certifications

- Python Programming (Beginner to Advanced) – Udemy
- Machine Learning Crash Course – Google Developers
- Power BI Data Analyst Associate – Microsoft
- **Completed Data Structures & Algorithms (DSA)** certification from Apna College.
- **Awarded 1st Rank** for outstanding performance in IBM Machine Learning Project Display.
